

## Our German memories

This experience in Germany has been great.

It has helped us to grow and to upgrade our abilities in the conversation with people that have different customs, languages and uses.

This experience has sensitized us about solidarity to Sri Lanka, to help a village devastated by a natural disaster.

We enjoyed ourselves throughout all period and we were very happy in Munich.

This experience has enriched our knowledge as we have lived in a completely different culture and state of mind.

We want to thank the families of our German friends, because they are so kind, gently and hearty with us and when we were there we felt as we were at home.

Another great experience was the food, we tasted a lot of traditional meals like schnitzel, pretzel and other meals whose names are too difficult for us.

All that will remain in our memory and in our heart.

When we came back to Naples we were very sad so we hope to repeat this experience, to meet again our foreign friends as and to follow the project, that is very interesting because it helps us to understand enterprise and its implications.

We miss all of the Erasmus group and we hope to see them soon.
