

My Erasmus+ experience

This year our school took part in the Erasmus+ Project in collaboration with other countries -Czech Republic, Poland, and Germany -

The main aim of this Project is settle a commercial enterprise that has also social and charity objectives, therefore we decided to help the people of Sri Lanka who suffered few years ago a flooding, by selling their traditional spices in our countries.

My group has already participated in a cultural exchange with Germany in December and another one is ready to leave for the Czech Republic.

In these trips we exchange with their cultures and show the work done in our countries and compare them, all working together.

In Germany we stayed in the house of foreign students, we have been around with them in different towns and working in their schools.

This experience abroad is important to improve our English and develop group activities and broaden our minds. Our school always tries to introduce this projects to the future students, organizing Open Days during which we talk with them about our experience in Erasmus+ project.

In our next Open Day, close to Valentine's day, possibly we will sell cakes for charity so to describe to everybody this beautiful project and inviting them to contribute.
